

EYE SEE YOU

Together with Masayuki Akamatsu I spent three weeks in Japan in March. The first two weeks I photographed nearly 600 Japanese in Kyoto, Himeji and Nara, from which the above picture was created. Masayuki-san showed the further development of our work „Ocean“ on several iPad-Pro. The client was Paris MIKI, eyeglass wholesaler in Japan, who is interested in using art

to appeal to the whole person and not just the customer.

We then spent a week exploring both Tokyo and the Izu Peninsula. Many new works from the WALKS series were created. Above all, however, it was a wonderful time in this country whose people have a finely developed sense of beauty, not to mention good food, proverbial courtesy and hospitality. Thanks to Masayuki-san, his family and the whole - very smart and professional - team.
