

### **I AM WE\_stay tuned**

About the fourth international meeting of participants in the global net art project „I AM WE\_interactive image“ has been widely reported in the last newsletter. During these inspiring days in Luxembourg the title „appreciative community“ was recommended by Klaus Haasis, thanks for that. It was the desire to get such inspiration not only once a year and to this target Andrea Winter, Karin Fietzek, Justus Theinert and I met at the creativespace in Stuttgart Olgastrasse and founded the series „I AM WE\_stay tuned“:

- To appreciate yourself succeeds as soon as one comes in touch with the self.
- To come into contact with oneself, there are different „techniques“.
- I AM WE\_stay tuned offers everyone to get to know such techniques.
- And use them for their own appreciation.
- The future has many jobs for people who appreciate themselves (all other jobs will robots take over).

The first workshop will be already at July 19., Justus Theinert is working on „unintentionally actions“.
