## I AM WE in Birmingham

The fifth I AM WE\_Usermeeting we met this year in May in Birmingham. Each participant is an active author of a personal photo diary in the global net art project I AM WE\_interactive image and wants also meet other users from other countries in person, share and participate in a current topic.

This year's theme *I AM WE\_IDENTITY* led us to interact with people of different communities and universities in Birmingham (Image above: Digital Humanities HUB Birmingham University). During the intensive time together also working on the Birmingham matrix into which were incorporated all the pictures of all those involved. The live projection was shown in different places of the city, on YouTube there is a video of it: <https://youtu.be/8SecBhIMBzE>.

Here there are a few pictures of our wonderful trip: [http://helzle.com/ii\\_2016\\_Brum\\_web/index.html](http://helzle.com/ii_2016_Brum_web/index.html)

I AM WE\_interactive image continues to be one of my main work on the relationship between individual and the collective. Keeping a photo diary under this art project intensified personal growth and can experience the connectedness with other people from all over involved in this as well at the same time. A cordial invitation to raise the personal appreciation: [www.interactive-image.org](http://www.interactive-image.org).

## Stunning art project

How to collect 60,000 images of the diary entries of 500 people from 70 countries over five years and to generate mosaics based on their profile pictures as infinitely changing image sequence?

## The future is invented constantly new

„With myMatrix as a participative art project I implement this process pictorially: With the help of stunning technique a 3D image world passing by, in which all parties will find both their own contributions, and can follow the resultant overall picture“.
