

myMatrix

On 9 November 2025, from 9 a.m. to 6 p.m., many visitors flocked to my studio in Petrushof in Obermarchtal to experience the projection of 16,000 images from my life so far onto the ten-metre-long wall there. The three-dimensional images floating through the room were accompanied by music from seventeen musicians, which was recorded in Michael Fetscher's WhiteFir recording studio.

A short video of this can be found [here](#)

Turin WALKS

A collector friend asked me if I could hang one of my works in his house in Turin. So I took this trip as an opportunity to create a small series of Turin WALKS. You can really wander for miles through arcades here. Right: Turin WALK #01, 2025, photographic condensation.

Deutscher Künstlerbund e.V.

On my 75th birthday, the German Artists' Association (of which I am a member) congratulated me with the words: "Your work is characterised by a unique combination of media art, photography and participatory image research. With your photographic condensations and spatial installations, you create visionary approaches to the themes of identity, community and perception, opening up new perspectives on the relationship between the individual and the collective."

Autobiografie

The extensive collection of material for my autobiography is now complete and is currently being designed. The book will comprise approximately 200 pages with around 350 illustrations and is scheduled for release next year.
